

a)**b)**

Muscle tissue development
Striated muscle tissue development
DNA-binding transcription activator activity, RNA polymerase II-specific
DNA-binding transcription activator activity
Learning or memory
Muscle structure development
Positive regulation of apoptotic process
Cognition
Positive regulation of programmed cell death
Behavior

Regulation of lymphocyte activation
Human papillomavirus infection
Leukocyte cell-cell adhesion
Hepatocellular carcinoma
Insulin signaling pathway
Regulation of leukocyte activation
Regulation of leukocyte cell-cell adhesion
Regulation of T cell activation
Glioma
Chronic myeloid leukemia
